smartlab

Smartlab Refresh

Refresh your SmartLab Learning environment with the latest PBL + STEM technology.
As technologies advance and equipment is worn, we recommend refreshing your SmartLab every three-to-five years. During this process our Team of Customer Success, Academic, Implementation, and Training Professionals will collaborate with you to ensure your SmartLab Learning environment is as innovative and engaging as day one.

Bundled Packaging Available

Bundled packaging is available for **Primary, Elementary, Secondary** and **Advanced Secondary** schools. Each bundle includes the technology, activities, and curriculum necessary to ensure your SmartLab environment has the most innovative and curriculum aligned environment for impacting student engagement and achievement, including:

» Computers with the latest OS and base software included as part of the CLS learning program

» All SmartLab Educational Kits

» Shipping and white glove installation

» Professional Development

Additional equipment and furniture can be added upon request

Initiate a Refresh
contact us at Support@clsonline.com

Plan & Deploy

CLS treats a customer refresh much like a new SmartLab installation. A Project Manager will be assigned to each school and a Project Plan will be provided with requirements, deliverables, and due dates leading up to the installation of the refresh. Delivery timeframe is about 4–8 weeks depending on what is included with the Refresh.

PROFESSIONAL DEVELOPMENT

smartlab

SmartLab HQ Refresh Professional Development

PD GOALS/OUTCOMES

» Learn how to use new kits, software, and technology included in your SmartLab HQ Refresh package.

» Develop a plan to integrate new resources into existing SmartLab HQ classes and rotations.

» Collaborate with other Refresh facilitators to build community and learn from each other.

PD COMPONENTS AND DESCRIPTIONS

Each SmartLab HQ Refresh package includes 3-part professional development **over six months:**

Part I: Refresh Technology Training and Integration Planning Session

Asynchronous online SmartLab Technology Training course introduces new technologies in the Refresh package and provides guidance on how to unpack, set up, and use the technologies with learners.

Two-hour synchronous planning session with a SmartLab trainer/coach to answer questions and integrate new technologies into the SmartLab HQ .

Part II: Instructional Coaching

Four rounds of synchronous online instructional coaching in collaborative cohorts with a SmartLab coach. Instructional coaching occurs in one-hour sessions.

Part III: SmartLab Learning Webinar

Registration in a SmartLab Learning Webinar developed to meet the needs and interests of Facilitators in the SmartLab HQ Refresh cohort. The webinar is scheduled after instructional coaching concludes.

Expectations for Administrators

Check in with SmartLab facilitator to support integration of Refresh technology and student-driven learning.
